SAGAR PATIL

Full Stack Developer | Angular | Node.js

Mumbai, India | 9075477371 | sagarpatil35137@gmail.com | github.com/sagarpatil-17 | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience building and modernizing CRM applications using Angular, Node.js, and MySQL. Migrated B2B CRM APIs from PHP to Node.js for a 200% throughput increase, and reduced unnecessary database queries by 60% with a Redis caching layer in a platform used by 500+ active partners daily. Led frontend modernization and a web development team delivering 5+ responsive, SEO-friendly websites, with hands-on experience in REST APIs and third-party payment integration. Built CVBoost AI, a full-stack resume analyzer powered by NVIDIA Nemotron, demonstrating practical LLM integration.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Imperial Platforms Pvt. Ltd. Nov 2022 – Present

Mumbai, India

- Migrated B2B CRM APIs from PHP to Node.js, reducing response times and increasing throughput by 200%.
- Developed and maintained full-stack CRM applications using Node.js, Angular, and MySQL to support core business operations.
- Led the migration of the B2C CRM frontend from PHP-based pages to Angular and Tailwind CSS, improving the user interface and application performance.
- Led a web development team and delivered 5+ fully responsive, SEO-friendly frontend websites.

PROJECTS

B2B CRM Platform — Imperial Platforms Pvt. Ltd. Jun 2025

Technologies: Angular 16, Node.js, Redis, MySQL, HDFC Bank APIs

- Designed and developed a highly available CRM platform using Angular 16, Node.js, Redis, and MySQL.
- Reduced unnecessary database queries by 60% by introducing a Redis caching layer.
- Integrated a secure payment gateway using HDFC Bank APIs.
- Supported a portal used by 500+ active partners daily.

B2C CRM Platform — Imperial Platforms Pvt. Ltd. Mar 2024

Technologies: Angular 14, Tailwind CSS, AG Grid, PHP-based legacy application

- Led the frontend migration from PHP to Angular 14 and Tailwind CSS, modernizing the B2C CRM interface.
- Integrated AG Grid with row virtualization to display 10,000+ customer records smoothly, eliminating dashboard lag.
- Developed efficient CRUD integrations and collaborated closely with the backend team to connect frontend workflows with backend APIs.

CVBoost AI — AI-Powered Resume Analyzer Personal Project

Technologies: Angular 22, Tailwind CSS v4, NestJS, TypeScript, MongoDB, Prisma ORM, NVIDIA Nemotron

- Developed an AI-powered resume analyzer that compares PDF resumes with job descriptions and generates match scores, matching and missing skills, strengths, and actionable improvement suggestions.
- Integrated NVIDIA Nemotron with prompt engineering to generate contextual resume insights and power an interactive AI assistant for job-specific guidance.
- Implemented structured AI response handling, JWT-based authentication, guest analysis, and persistent analysis history for registered users.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, React.js, Next.js

Backend: Node.js, NestJS, Express

Databases & Performance: MySQL, MongoDB, Redis, Prisma ORM

AI Integration: NVIDIA Nemotron, LLM Integration, Prompt Engineering

TRAINING AND CERTIFICATION

Full Stack Development – MEAN Stack — Livewire 2022

EDUCATION

Bachelor of Science: Computer Science — Mumbai University 2022
